LEADERSHIP

EXPERIENCE

STRENGTH
Envirocon is an industry leader providing full-service environmental remediation for government and private sector clients across the United States. Backed by our dedicated employees, financial strength, and owned equipment fleet, we focus on delivering safe, high quality, and cost-effective solutions to our client’s complex environmental challenges. Whether the challenge is demolition of a former industrial building, excavation of radiologically impacted soil, or removal of contaminated sediment from a river, we have the specialized expertise to partner with our clients and implement a solution. As a self-performing remediation contractor, we employ our multidisciplinary construction expertise and bring a technical team (safety and management professionals, engineers, and scientists) to effectively and efficiently complete our client’s projects.

Excavation, placement, compaction, and grading of saturated and dry ash, along with dewatering and water treatment

AT A GLANCE

Founded: 1988
EMR: 0.44
Projects Completed: 3,000+
Business Size: Large Business
Bonding Capacity: $100,000,000
Dewatering, fill, and closure of 30 acres of spent talc ponds

Environmental Remediation
- Soil & Groundwater Remediation
- Capping & Containment
- Mine Reclamation
- Sediment Removal & Management
- Radiological Site Remediation
- Geotechnical Construction
- In Situ & Ex Situ Treatment

Decommissioning & Demolition
- Total/Partial Plant Decontamination, Dismantling & Demolition
- Recycling & Asset Recovery
- Waste Characterization & Separation
- Site Restoration

Resources
Envirocon’s commitment to service is backed by our significant resources: dedicated employees, a large owned equipment fleet, and a superior balance sheet. Our large pool of veteran professionals and field personnel provide a solid base to over 375 employees. Our team has the diversity of experience to perform straightforward demolition projects or complex, multi-year projects with difficult waste streams. Envirocon’s professional staff includes experts in demolition, construction safety, industrial hygiene, engineering, quality, health physics, and project management. This diverse mix of technical capabilities sets us apart in the market and enables us to bring an innovative and value-added approach to our client’s projects.

Envirocon owns one of the largest fleets of heavy and specialized construction equipment in the industry. Our owned equipment inventory of more than 350 pieces includes excavators, loaders, dozers, haul trucks, and customized specialty attachments. Equipment maintenance is key to providing safe and efficient service and our in-house maintenance department keeps our inventory in top condition. Our financial strength also allows us to continually update our equipment fleet and meet stringent air quality standards. Coupled with our zero-idling policy, this allows us to meet our commitment to environmental sustainability and “green” initiatives.

History
Envirocon’s financial strength is a direct result of stable ownership and consistent business practices, which allows us to provide our clients with the highest quality insurance coverage and bonding capacity that meets their needs. Our unrivaled financial strength brings added security to the multiple Fortune 500 companies and government agencies that use our services.

A member of the Washington Companies, Envirocon was founded in 1988 to serve the growing demand for specialty construction services including demolition and environmental remediation. The Washington Companies’ are known for their financial strength, visionary leadership construction skills, and equipment resources across 11 separately operating companies. Today, the Washington Companies provide services across the United States and Canada focusing on the core industries of environmental remediation, rail transportation, marine transportation, mining, heavy equipment sales, and aviation technology. Our affiliation gives us the ability to interconnect and combine resources and remain highly competitive.

RELIABILITY MEANS MEETING ALL OF OUR COMMITMENTS
Behavior Based Safety Program
Recognizing that incident-free performance on all projects relies on the attitude and knowledge of every project participant including our subcontractors, Envirocon’s safety program involves all employees from the CEO to those on construction sites. The program is behavior-based, focused on what our employees do and why they do it, and strives for continuous improvement. Envirocon’s safety program is fully compliant with the Occupational Safety and Health Administration (OSHA) and state. Envirocon’s project managers are responsible for the health and safety performance of their project teams, the public, and other stakeholders. They are fully supported by a professionally staffed Health and Safety Department. Our career safety professionals have academic and technical training and a wide range of certifications in occupational health, industrial hygiene, and health physics. Our safety professionals have the specialized training required to support our work in remediation, high toxicity and Level A cleanups, radioactive, and mixed wastes.

Partnering with Clients
Envirocon partners with our clients to achieve outstanding safety performance. We have successfully participated in our clients’ best-in-class safety programs meeting rigorous safety performance criteria nationwide. As part of these teams, Envirocon stood with our clients through challenging program and site inspections that resulted in: project-specific OSHA Voluntary Protection Programs (VPP) Star status awards, Occupational Health & Safety Advisory Services (OHSAS) 18001 certification, and International Standards Organization (ISO 14001) certification. Formal safety recognition has also come from our private clients in the mining, refining, and chemical industries.

Performance
The success of Envirocon’s safety program is demonstrated by our safety metrics, verifiable measures of performance. These metrics include the Experience Modification Rate (EMR). Our EMR is significantly lower than other firms in our industry.

SAFETY IS THE FOUNDATION FOR EVERYTHING WE DO
Operational Excellence

Envirocon’s leadership embraces a philosophy of Operational Excellence (OE) and continuous improvement where all facets of the company are openly evaluated with the goal of achieving sustained improvement in an environmentally responsive fashion. This top-down philosophy relies upon innovation, problem-solving, teamwork, and leadership to maintain a focus on our clients’ needs, while also keeping our employees empowered and engaged in their work.

Quality Program

The primary focus of our OE program is delivering best-in-class, high-quality service. Our Quality Management System (QMS) is the foundation of our quality program and was prepared in accordance with recognized QA/QC industry standards and protocols. The quality program engages employees at all positions and is supported by written protocols and operational SOPs. Our knowledgeable project professionals adhere to our best practices and quality standards, while at the same time challenging themselves and our teams to identify avenues for improving the quality of service we deliver. This process drives our project management personnel to plan, act, evaluate, and improve.

Social Responsibility

Social responsibility at Envirocon is embodied in our vision statement: Inspired People Improving our World. Led by the highest levels of management, we strongly believe that each decision we make provides long-term benefits to our employees, the communities we work in, the environment we restore, and the clients we serve.

Our Commitment

Envirocon is committed to safely and responsibly growing our business and serving our clients while focusing on the interests of future generations. Our commitment to social responsibility directly impacts how we conduct ourselves and our business. We base our social responsibility conduct on four initiatives: Health and Wellness, Sustainability, Ethics and Business Conduct, and Community.

Health & Wellness

Envirocon endeavors to enhance all aspects of the employment experience of our workforce. We are proactive in promoting a positive work environment by fostering employee dialogue, diversity and inclusion, work-force development, compensation and benefits, and encouraging good health. Wellness education is at the forefront of our priorities. Programs such as our Self-Care Campaign and Consumer Driven Health Benefits Program illustrate this focus and improve our overall performance.

Sustainability

With our overall environmental focus, we are committed to operate in an environmentally responsible fashion. We use energy-efficient equipment to conserve natural resources and energy on our projects and in our offices. We use biodiesel to reduce emissions, use non-hazardous materials whenever possible, and employ renewable power sources whenever practical. We aggressively minimize waste and recycle and reuse materials such as metal, concrete, slag, and asphalt.

Community

Envirocon is an engaged member of the community where we live and work. We use local resources to support projects and strive to establish good communications within the areas where we work. Envirocon is active in charitable organizations such as Habitat for Humanity, Special Olympics, the Red Cross, and many others. As one of the Washington Companies, we support the Dennis and Phyllis Washington Foundation, whose mission is: “Investing in people to improve the quality of their lives.” www.dpwfoundation.org

Ethics and Business Conduct

Envirocon’s leaders and managers uphold our high ethical standards and lead by example. Our formal Code of Business Conduct and Ethics program, a guide for the behavior of Envirocon employees and those who do business with Envirocon, is structured to prevent ethical compromises. Envirocon’s management personnel receive ethics compliance training. We provide an anonymous avenue for reporting behavior that might violate Envirocon’s values, commitments, or Code of Business Conduct and Ethics.
