

Envirocon Draws on Past Experience to Win Another Dam Removal Project

Envirocon was recently awarded a competitively-bid, design-build contract by Seattle City Light (City Light) for the Mill Pond Dam Removal and Habitat Restoration Project located in Metaline Falls, Washington. The site is located on a small tributary of the Pend Oreille River in the remote northeast corner of Washington State. The dams, originally used for lumber milling operations and power generation, are being removed to restore the natural riverine ecosystem structure and function to Sullivan Creek. This project is part of long-term plan for watershed improvements and restoration of the original site while preserving and enhancing the recreation and cultural amenities of the area.

Leveraging its growing design-build experience, Envirocon assembled a uniquely qualified design team to prepare a superior technical and responsive proposal for City Light. Envirocon and its team used City Light's project goals and objectives to develop an innovative preliminary design which received the client's highest technical scoring. Envirocon's team brings a variety of unique, specialized skills from past experience with complex dam removal, river reconstruction, and habitat restoration.

Meet Our Team

Bud Stevens Elected to the National Demolition Association Board of Directors

The National Demolition Association (NDA) held its 43rd Annual Convention and Expo "Demolition 2016" in Orlando, Florida on March 14-17. The meeting is a gathering of over 1,000 demolition professionals within the demolition industry. During this meeting, Mr. Bud Stevens was elected to the NDA Board of Directors for a 3-year commitment. Mr. Steven's role is it to ensure that the NDA's platform is clearly communicated as the voice of the Demolition Industry. He now holds a seat for 2016 on the Education Committee and will serve on the new Government Affairs Committee, which is focused on federal regulatory changes for the demolition industry. This is Mr. Stevens second term on the board, as he was co-chair of the

Environmental Committee from 2009 to 2012. While serving in this role, he developed the criteria for selection and award of the annual recognition program.

More than 600 companies with a wide range of demolition activities are members of the NDA. The NDA provides education, advocacy, and industry updates to members while increasing public awareness of the economic, community, and environmental benefits of demolition.

Interview with an Expert: *Joe Vendetti Talks About Demolition*

Q: With the construction economy improving, what are the greatest challenges you are facing?

Vendetti: The greatest challenge for us too is finding skilled workers. Whether it is laborers, burners or operators, we are having a difficult time finding qualified applicants.

Q: What are the most significant environmental challenges facing demolition contractors right now?
